WORK EXPERIENCE

CHIEF TECHNICAL OFFICER Actieve

2024-Present

Leveraged my personally developed rapid application development architecture to prototype and launch multiple market-ready applications, driving company success. Developed a healthcare time and attendance management platform with automated government reporting and digitalized tracking, replacing traditional paper-based hospital processes. Created a telecom infrastructure management platform for Starlink and other providers to monitor and maintain satellite and failover internet services for major global clients. Additionally, in response to an IRS audit highlighting inefficiencies in rental reporting, led the development of a platform facilitating seamless communication and intrinsic reporting between landlords and tenants, enabling automated report generation for agencies like the IRS

2021-2024

CHIEF TECHNICAL OFFICER RunFree

Developed and implemented a rapid application development process focused on feature delivery over unnecessary architectural complexity, leading a team to build a competitive eCommerce platform. Successfully outperformed competitors, achieving a seven-figure ARR within two years before selling the platform to FullSteam Ventures. Additionally, designed and executed a streamlined onboarding system to capture customers lost by a failing competitor, doubling revenue in just two months.

DIRECTOR OF SOFTWARE DEVELOPMENT NetFoundry/Tata

2017-2021

Established and led a user interface design and development team, implementing an agile process to streamline UI deliverables from graphic compositions to Angular/TypeScript code. Designed and set up a DevOps structure for continuous integration, incorporating an offshore testing team and providing guidance on deploying interface deliverables to production. Developed both prototypes and production-quality interfaces, playing a key role in NetFoundry's success during its early stages.

MOBILE DEVELOPMENT MANAGER Skillsoft

2015-2016

Built and led the team responsible for the development, testing, and maintenance of the Skillsoft mobile application, along with mobile initiatives for its subsidiaries, including SumTotal and Vodeclit. Spearheaded a complete product rewrite while managing a team of five developers, three QA testers, a product and project manager, a scrum master, and shared resources across design and marketing to ensure a seamless production environment. Personally optimized resource allocation, reducing outsourced spending from \$400,000 per month to just over \$400,000 per year by strategically leveraging well-organized offshore teams.

PRINCIPLE UI/UX ARCHITECT/ENGINEER Axeda/Thingworx/PTC

2011-2015

Led the first departmental restructuring, establishing dedicated User Interface Design, Architecture, and Engineering teams to streamline visual and technical needs across departments and clients. Built and staffed a specialized team for mobile application development, graphic design, enterprise interface engineering, and print design. In an environment previously operating with mixed infrastructure and overlapping responsibilities, this restructuring set foundational guidelines for other departments, improving efficiency in web services, data management, and release automation.

HEAD OF UI ARCHITECTURE Paychex

2007-2011

Pioneered the adoption of Flash as the standard UI development platform across all products, establishing an enterprise-wide standard utilized by over 300 developers across multiple teams. Led the mobile initiative by developing prototypes using native technologies such as ADK, XCode, Blend, Web Works, and Ares, as well as cross-platform tools including Mojo, AIR, PhoneGap, and mobile web frameworks like Kendo Mobile, Sencha, and jQuery Mobile. Organized and trained the company's user interface group to streamline the design and development process, addressing a key inefficiency identified in a Six Sigma study. Additionally, managed the team responsible for delivering a unified interface for the company's single sign-on initiative, enabling seamless integration across a diverse product suite while supporting flexible design practices.

DEVELOPMENT LEAD University of Rochester

2003-2007

Led projects spanning multiple medical systems, leveraging next-generation technologies such as AJAX and Web Services to enhance interoperability. Fostered cross-departmental collaboration, breaking down silos to minimize product redundancy. Designed and implemented an innovative system that streamlined identity and access management across the university and hospital, enabling seamless administration of email, network resources, system access, domain accounts, and proprietary applications. This solution reduced a previously 10-hour process to near-instant execution while shifting responsibility to direct managers, significantly reducing system administration overhead.

PRINCIPLE WEB APPLICATION ENGINEER Quality Vision/Optical Gaging

1999-2003

Managed web solutions for all companies under QVI, including Optical Gaging Products, Quality Services, View Engineering, RAM Optical, and AG Slides. Developed and maintained a system that facilitated seamless messaging and document sharing between sales and operations while ensuring each company retained its unique branding. Designed a flexible platform that supported multiple marketing strategies, allowing the subsidiaries to operate independently under the unified direction of the parent corporation

CONSULTING EXPERIENCE

On3 Solutions

2013 BINARIAN

2012-2018 CLOUDSMARTZ

2018-2024

SUMMARY

Visionary development architect with over 15 years of experience designing next-generation systems, processes, and environments that push the boundaries of innovation. A proven leader at the forefront of the software industry, driving transformation within both agile startups and Fortune 500 corporations. Renowned for building high-performing teams and fostering environments that balance efficiency with creativity. Adept at solving complex challenges through both conservative and bold approaches, delivering cutting-edge solutions that are ahead of their time and built to stand the test of time.

SPEAKING ENGAGEMENTS

Adobe MAX
Content Management Systems

IOT Connexion Conference
Rich Internet of things Applications
The Connected Drone

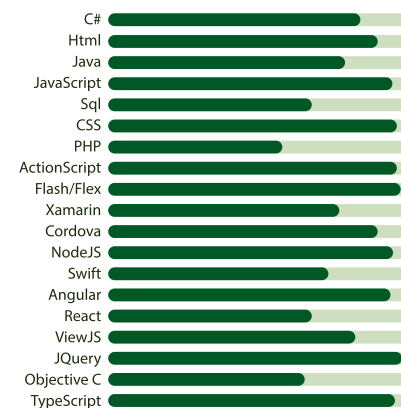

Adobe User Groups
Building Mobile Apps With PhoneGap
Cross Platform Development With Adobe Flex
Rich Audio Editing with Adobe Audition
Photoshop Tips & Tricks
Introduction to Adobe Premiere

EDUCATION

St. John Fisher College
B.S. Computer Science

Graduated summa cum laude, Deans list every applicable semester, and served on the University IT Web Committee.

PROFESSIONAL SKILLS

VENTURES

Smpl Founder/Product Owner
Cloud Intranet for small business

Unisend Systems Co-Founder/VP Development
Internet of Things Platform for connecting any device with social network style interfaces

Tooddlers Co-Founder/Development Manager
Mobile Childrens games, educational material and animated books

Engage Inc Co-Founder/CTO
White Label Social Networking Server for the Enterprise

Swipe App Labs Co-Founder/Tech Resource
Unfold News Reader for mobile devices

Shopleaf Co-Founder/Tech Resource
E-Commerce solutions for small businesses and artisans
